# Address of the Chairman of the Board and Chief Executive Officer

Since our last Annual General Meeting, important changes have taken place in the Bank's senior management and I deem it necessary to comment them here.

At the beginning of the year, I had informed my colleagues on the Board that I wished to share my responsibilities and resign as president, while expressing my willingness to continue exercising my other functions. The Directors accepted my request. In February, Mr. Michel Bélanger was appointed a Director by the Board and was elected President of the Bank. He assumed his functions on the first of April. Since that date, I have continued to act as Chairman of the Board and Chief Executive Officer.

We are very happy that Mr. Bélanger has accepted to join our ranks. In his new capacity, he makes the Bank benefit from his extensive economic training and broad experience gained in both the public sector where he held several important offices and the private sector, especially as President and General Manager of the Montreal Stock Exchange. His contribution is particularly appreciated at a time when the Bank is not only increasing its business volume but also entering new and complex fields.

During the course of the year, other changes have also occurred in the Board of Directors. Last June, Mr. Benoit Benoit resigned and it is with regret that we had to accept his decision. Mr. Benoit had served on your Board between 1954 and 1976 and on the Investment Committee during four years. I am sure that all his colleagues would wish to join me in extending to him sincere appreciation for his participation in our meetings.

In order to fill the post of Director left vacant by Mr. Benoit's departure, we appointed Mr. Maurice Soucy of Rivière-du-Loup. Mr. Soucy has a wide business experience and his contribution is much appreciated. I am convinced that our shareholders and customers of the Lower Saint Lawrence Valley area in particular are happy to have him participate in the Bank's progress.

It is with deep regret that we learned of the death of Mr. Georges E. Turcotte in last November. As an agronomist, Mr. Turcotte worked all his life in the sector of agricultural cooperatives and, as you already know, at the time of his last illness he held the position of General Manager of the Federation of Cooperatives of Quebec. Mr. Turcotte had been appointed a Director of the Bank in March 1971 and had been serving on the Executive Committee since April 12, 1972. He was admired by his colleagues for his competence, dedication and remarkable simplicity. His untimely passing represents a great loss for the Bank.

To fill the post left vacant by the late Mr. Turcotte, your Directors invited Mr. Guy Bernier of Montreal to serve on

the Board of Directors. Last May, Mr. Bernier was elected President of l'Union régionale de Montréal des Caisses Populaires Desjardins. He previously had participated for many years, under various capacities, in the management of Quebec United Fishermen, of which he was General Manager from 1963 to 1976. Mr. Bernier has a wide management experience and his contribution to the Bank's progress will be most appreciated.

will be most appreciated.

In the addresses that will follow, the President, Mr. Michel Bélanger, will give us his views on various aspects of the White Paper on the Canadian Banking Legislation and the Vice-President and General Manager, Mr. Jean Machabée, will comment the financial statements of the past year. As for me, I cannot conclude without talking briefly about a subject which is of great interest to you, the value of the Bank's shares. At their present market price, they certainly represent an exceptionally advantageous investment because not only do they offer a promising outlook but they also provide

a high yield.

The latter, which stands at about 8% can be compared to an average yield of approximately 5.6% on shares of industrial companies quoted on the Toronto Stock Exchange and of 5.35% for those quoted on the Montreal Stock Exchange. If, in addition, we take into account the income tax deductions on shares dividends, it may be noted that the yield of our shares is accordingly increased and may be compared to that of good fixed income securities.

As a result of their low quotation our shares are trading on the stock market at a price nearing their book value and at a rather low price when compared with earnings. They are trading at about 5 times the earnings per share compared with a price/earnings multiple of around 8.1 times for shares of companies listed on the Toronto Stock Exchange industrial indexes and of 8 in the case of the Montreal Stock Exchange.

Earnings per share of the Bank have grown at a most satisfactory pace during the last ten years. We are confident that this progress will continue. For all the reasons that we just gave you, we believe that the Bank's shares offer an excellent appreciation outlook while providing holders with a good yield.

Léo Lavoie

# Address of the President

# The Revision of The Bank Act

Last summer, the proposals of the Canadian Government concerning the revision of the Bank Act have been published in a White Paper. This has provoked numerous comments by interested parties and, as was to be expected, differences of opinion have emerged. Besides, certain aspects call for further clarification. This is why financial institutions have made new suggestions to the Government. Some of its recommendations will certainly be modified, but the principal proposals, the main topics of the reform outlined in the White Paper, will probably be included next year in the legislation.

I intend to comment briefly on these general features. They are of utmost concern to all of us, whether we are bankers, shareholders, savers or borrowers, investors, industrialists or merchants, because they will change the structure and the rules of the game as

we know them.

The Proposals of the White Paper

The philosophy of the White Paper emerges right from the first pages in the following sentence—and I quote: "The soundness of the basic approach to the strengthening and development of the financial system through effective and equitable competition was reaffirmed by the Porter Commission, was central to its recommendations, and remains the basic underlying objective of the government in its approach to banking legislation."

Faithful to the spirit of the studies undertaken by the Royal Commission on Banking and Finance (the Porter Commission), which had prepared the ground for the revision of 1967, the Government thus has set the promotion of competition as its principal objective. To achieve it, the Government proposes a more open financial system, within which various financial institutions engaged in the banking business would be governed by the same rules and would be able to compete on an equal basis.

I readily endorse this objective, for competition is the source of progress in a market economy. The intention of the Government, moreover, is consistent with the trend that has developed since the latest Bank Act revision ten years ago, and which will continue in the future along with technological and socio-economic changes. The evolution has not tended towards a monopoly for the chartered banks, but quite the contrary, towards a diversification of banking institutions. The plan to submit the various deposit-taking institutions to the same regulatory structure and to a more uniform legislation is a good one if one wants to attain more equity and to avoid a disorderly development of the banking system in the future.

This objective is, moreover, justified. Actually, the role of near-banks in the financial system has not ceased to grow. From 1946 to 1975, their share in the total Canadian dollar assets of the major financial institutions has increased from 8 to 22 per cent, while their portion of the assets of the deposit-taking institutions has risen from 12 to 32 per cent. Furthermore, from 1967 to 1975 the assets of the nearbanks have increased more than those of the chartered banks: by 230 per cent against 206 per cent.

I should like to recall that the Economic Council of Canada, in a recent study on deposit-taking institutions, has also taken the view that the principal objective of any reform is to promote competition between financial institutions. Finally, it is also one of the goals pursued by the chartered banks in the submission that the Canadian Bankers' Association has presented to the Government.

This does not mean, however, as been said, that the Government is pre-pared to agree to all the requests of the banks. Far from it. A careful examination of the White Paper proposals shows that it rejects a reduction in the banks' mandatory reserve requirements which, at their current high levels, tax the banks unduly and increase the costs to clients; the banks are also required to build up reserves against part of their foreign currency deposits; the possibility to offer electronic data processing services to bank customers is severely restricted; the ability of banks to acquire shares in other companies, to have affiliates or associate enterprises is reduced; the banks will not have the right to underwrite corporate securities and to act as agents in the private placement of these securities, although they may continue to underwrite Government securities and to distribute them. And I am skipping over many other items; this list is far from complete.

In view of these circumstances, I do not think it is reasonable to contend that the White Paper proposals are mostly in favor of the banks. It must be recognized, however, that on the whole the objectives of the White Paper—competition and efficiency—do not differ from those proposed by the banks in their concern to serve the public interest well.

Establishment and Development of New Banks

In what way does the Canadian Government intend to promote a healthy competition in the banking system? What means does it plan to use? The Government proposes to attain these objectives by facilitating access to the banking system, in other words, by making it easier for new financial institutions to gain entry in this sector. The White Paper leaves no doubt about it. After having recalled that "reasonable freedom for new firms to enter an industry helps to assure a healthy level of competition with-

Michel Bélanger

in that industry", it adds that "the recent acceleration in the establishment of new banks is important and welcome. But in view of the relatively high concentration of total banking business among the larger banks, entry and growth of new banks should be encouraged and facilitated as far as possible."

To this end, the Government proposes to remove certain obstacles to the establishment of new banks. The conditions under which a bank can be incorporated would be eased. Thus, sponsors would be able to establish a bank by letters patent, without Parliament being obliged to adopt a special Act. It would thus be much easier than it is at present. Moreover, the near-banks, which are governed by provincial laws, could under certain conditions obtain the status of a chartered bank. The White Paper also proposes that provincial governments may hold up the 25 per cent of the share-capital of a new bank. Finally, the Government opens the door to foreign banks, by permitting their subsidiaries to obtain, on certain conditions, the status of a chartered bank.

Already the foreign banks in Canada perform banking functions that escape federal regulation. Their activities are far from negligible; their affiliates in Canada possess more than 40 offices and their assets surpass \$2 billion. This step will consequently make the system more equitable and more rational. It is possible that Canadian banks, on the strength of the reciprocity principle, could now establish themselves in countries barred to them because their banks are not officially recognized here by Ottawa. It is also possible that the lack of reciprocity elsewhere compels certain foreign banks that have already established subsidiaries here to continue to operate outside the Bank Act.

Some time will elapse before it will be known how many financial institutions would wish to avail themselves of this opportunity. There certainly will not be a rush, because the establishment of a new bank is a complicated and costly undertaking; in addition, the provisions of the White Paper limit the size and the expansion of foreign banks. Consequently, the structure of financial markets and the current competitive equilibrium will not undergo a radical change from one day to the next. And for all that, we will not be in a position of free and perfect competition, which does not exist in practice in any sector of activity in modern market economies. After elimination of certain artificial restraints, however, the majority of financial institutions will be subject to the same rules of operation, whatever their size, and they will have the free exercise of a body of legal powers.

# The Effect of Intensified Competition

The encouragement of competition

between financial institutions is not, however, an end in itself. What matters are the means employed to reach it and above all, the likely consequences. In this respect, one may reasonably assume that the increase in the number of establishments on the market will lead the banks to continue to innovate, to offer a greater variety of services to their customers and to increase their efficiency.

The efficiency of the banking system is certainly the best guarantee for the protection of the saving public. It cannot fail to contribute also to a strengthening of the financial structure. This is important, for the future investment needs of Canada, and of Quebec in particular, will be considerable. The development of hydro-electric power, the exploitation and processing of our natural resources and the expansion of our infrastructure will require investments which will probably be in the order of \$800 billion (current dollars) during the next ten years. The largest part will be derived from Canadian savings, but it will all the same be necessary to have recourse to foreign savings.

The financing of such investments requires a sound and strong financial system, of which the banks will form part in their function of intermediaries between savers and investors, both on Canadian and international markets.

**Banking Activities** 

The impending strengthening of competition might suggest that the market served by each bank would shrink. This is far from certain, however, for the White Paper proposes to extend the banks' field of operations in order to make specialized financial services more accessible to the public. The Government plans to authorize the banks to engage directly in financial leasing of equipment. This type of transaction has grown rapidly during recent years, in Canada as well as in the United States, but those who have benefited most from its growth have been the affiliates of foreign banks and some Canadian enterprises. The few Canadian banks which to date have participated in it have done so through the intermediary of companies which they control in part.

The White Paper also recommends that the banks engage in factoring, which is a practice whereby a producer of goods or services sells his accounts to a third party which must assume the credit risk and collect the accounts. The American banks have practiced factoring since 1963 and some among them have even established themselves on the Canadian market. It is a financial sector which has known relatively little growth in Canada, but which could expand rapidly under the impetus of the banks.

The amount banks may have outstanding in conventional residential mortgage loans is currently limited to 10 per cent of their Canadian deposit

liabilities and debentures. Ottawa proposes to remove this ceiling in order to facilitate the financing of housing. The majority of banks are operating well below the 10 per cent limit; therefore, what it amounts to is the removal of an inoperative restriction. The average for all Canadian banks is close to 6 per cent and at the Provincial Bank our conventional mortgages represent only 5.5 per cent of liabilities.

Furthermore, the White Paper offers banks the possibility of issuing nonredeemable certificates of deposits with a term of more than one year, without maintaining reserves against them at the Bank of Canada. This arrangement is advantageous both for the savers and for the banks. It should allow the banks to cope with the competition of the nearbanks, which are able to offer higher rates because they do not have to consider the

cost of reserves.

The Government finally proposes to soften the conditions under which the banks may attract capital. They would be able to issue no-par value shares, convertible preferred shares, convertible debentures denominated in Canadian dollars and non-convertible debentures in foreign currencies. They would also be able to declare stock dividends. This system would resemble rather closely that in force for other corporations. I believe that this is ground for satisfaction, although I think that there are hardly any reasons to keep some of the restrictions that will remain.

These recommendations are of particular interest to the Bank and to its shareholders. They would actually permit us to enlarge our own resources in line with the expansion of our balance sheet and they would augment our operating funds. In addition, we would be able to achieve a better balance between our equity capital and our commitments. Finally, a larger and more flexible capitalization should result in a relative decline in the cost of financing

#### The Growth of The Provincial Bank of Canada

All things considered, you will note that the new fields of activity open to the banks are far from trifling. What place could the Provincial Bank occupy in this new environment? Obviously, we will have to face keener competition. We will have to maintain, if not improve, our position in an increasingly competitive market. I am not worried about it, because the performance of your Bank, in recent years, bears witness to its vitality. I am confident that we can meet this challenge

Since the latest revision of the Bank Act, in 1967, the Provincial Bank has opened 63 new branches—a figure which does not include the branches of The People's Bank taken over in 1970. Our growth, in several sectors, has turned out to be more rapid than that of the banking system as a whole.

In the four years from June 1972 to June 1976, for instance, our personal loans have increased by 132.1 per cent compared to 118.2 per cent for all the banks in Canada and our mortgage loans by 307.5 per cent against 188.1 per cent. Our deposits have also risen at a faster rate than that applying to the banking system as a whole. Also, over the last two years, our progress in Quebec alone, where 83 per cent of our operations take place, is superior to the advance recorded by the system as a whole, so that our share of the market is increasing. Our assets, from March 1974 to June 1976, have risen by 59.6 per cent compared to 43.3 per cent for all the banks. We are already facing strong competition and increased competition does not present particular difficulties

Furthermore, certain recommendations of the White Paper-always assuming that they will be implemented are likely to be advantageous to us. Experience shows that financial leasing is particularly useful to small and mediumsized enterprises, which often have limited capital resources, are rapidly growing and find themselves short of working capital. The same applies to factoring, which also is convenient for small businesses. Now, as you know, a large part of our customers are found in this category. Again, the reduction of the reserve against the first \$500 million of savings deposits from 4 per cent to 2 per cent benefits us relatively more than the larger banks. Finally, it is likely that the future competition of foreign bank subsidiaries deciding to become chartered banks will manifest itself more on the markets of the larger banks than on our own.

We have already started to prepare the action that we shall have to take in this new setting. In the months to come, as the final arrangements of the proposed Bill become more explicit, we shall step up these preparations. But it is on the human resources, in other words, on our entire staff, at all levels, that we can and

must rely.

In fact whatever the changes in the legislation or in the competitive climate, whatever the financial or material resources at our disposal, it is ultimately the staff, men and women of the Bank, who will give to our depositors, to our borrowers, to all our customers, the first rate service that will enable us to meet the challenge of the competition.

Active in all sectors of its environment, The Provincial Bank of Canada is particularly proud of its contribution to the development of small and mediumsized enterprises. The economic importance of the role played by an institution such as ours is clearly illustrated by the Bank's activities in this field.

### Statement of Assets and Liabilities

#### Auditor's Report to the Shareholders

We have examined the statement of assets and liabilities of The Provincial Bank of Canada as at October 31, 1976 together with the statement of revenue, expenses and undivided profits and the statement of accumulated appropriations for losses for the year ended on that date. Our examination included a general review of the accounting procedures and such tests of accounting records and other supporting evidence as we considered necessary in the circumstances.

In our opinion, the foregoing statements present fairly the financial position of the Bank as at October 31, 1976 and its revenue, expenses and undivided profits and accumulated appropriations for losses for the year ended on that date.

related to appropriation from current year's operations—note 3	2,450,000	3,900,000
Transferred to undivided profits	(3,000,000)	(2,000,000)
Accumulated appropriations at end of year General appropriations	27,659,760	24,886,428
Tax-paid appropriations	3,897,294	2,469,217
Total 7	\$31,557,054	\$27,355,645

### Statement of Rest Account

for the financial year ended October 31, 1976

	1976	1975
Balance at beginning of year	\$58,864,035	\$47,000,000
Premium received on capital stock subscriptions—note 2	1,135,965	7,151,535
Transferred from undivided profits	7,000,000	4,712,500
Balance at end of year	\$67,000,000	\$58,864,035

#### Notes to the Financial Statements

1. The debentures, subordinate in right of payment to the claims of depositors and certain other creditors, consist of:

	1976	1975
7-1/2% sinking fund debentures, maturing in 1977 with holder's option to extend the maturity date to 1991	\$15,000,000	\$15,000,000
8-1/2% sinking fund debentures, maturing in 1981 with holder's option to extend the maturity date to 1990 at the rate of 8-3/4%	10,000,000	10,000,000
9-1/2% debentures maturing in 1982	10,000,000	
	\$35,000,000	\$25,000,000

2. During 1976 all outstanding instalments for the shares issue of 1975 were paid, resulting in the addition of \$267,286 to paid up capital and \$1,135,965 to rest account.

3. Provision for income taxes shown in:

	1976	1975
Statement of revenue, expenses and undivided profits	\$14,800,000	\$13,780,000
Statement of accumulated appropriations for losses: Related to tax deductible appropriations	(2,450,000)	(3,875,000)
Related to taxable capital gains (losses)	_	(25,000)
	(2,450,000)	(3,900,000)
Total provision for income taxes	\$12,350,000	\$ 9,880,000

4. Under the Anti-Inflation Act and the rules and regulations in force since October 14, 1975, the Bank is subject to the restrictive measures on prices, wages, profit margins and dividends relative to its domestic operations.

During the compliance period ended October 31, 1976 the Bank has complied with the rules and regulations established by the Anti-Inflation Board.

#### **Pro-Can Realties Limited** Controlled Corporation **Balance Sheet**

	1,100,000	
RETAINED EARNINGS	20,548	1,120,548
		\$4,710,470

Note The Provincial Bank of Canada owns the entire capital stock of Pro-Can Realties Limited with the exception of the directors' qualifying shares. It is carried on the books of the Bank at \$1,099,400

#### Auditors' report to the shareholders

We have examined the balance sheet of Pro-Can Realties Limited as at October 31, 1976. We have obtained all the information and explanations that we have required. Our examination included a general review of the accounting procedures and such tests of accounting records and other supporting evidence as we considered necessary in the circumstances.

In our opinion, this balance sheet presents fairly the financial position of the company as at October 31, 1976 in accordance with generally accepted accounting principles applied on a basis consistent with that of the preceding year.

#### Report of the Vice President and General Manager

#### General Situation

I am very pleased to submit for your approval the results of the Bank's financial year ended October 31, 1976.

This last year was marked by the measures of the Anti-Inflation Board which were applied along with the monetary policy of the Bank of Canada. As you already know, the latter's objective is to progressively curb inflation and attain a reasonable rate of real economic growth through a gradual reduction of the money supply growth rate

Our Bank has agreed to fully cooperate with the Board by not increasing service charges above the levels in force on October 13, 1975 and, in general, by not widening the spread existing at that date between the rates required from certain categories of borrowers and the rates paid on Canadian dollar deposits. Added to an inflation rate that remained high, these restrictions have naturally affected our results which, all things considered, are satisfactory. In fact, the balance of revenue after income taxes rose by 20.6% over last year to \$16,988,409. Total assets at October 31, 1976 amounted to \$3,624,162,284 This represents an increase of over \$500 million in one single year, thus showing the ever-increasing importance of the Bank

Deposits

The restrictive monetary policy pursued by the Bank of Canada throughout the year has had an impact on the management of our deposit liabilities. In addition to affecting bank liquid assets downwards, such a policy has contributed to maintaining short-term interest rates at a high level. Hence, the rates on 90-day deposits became almost as high as those on 1 to 5-year term deposits.

This year, we have increased our Canadian dollar deposits by 23% and at year-end they totalled \$2,585,500,573. The contribution of personal savings deposits, including registered retirement and home ownership savings plans, represents half of this amount.

Loans

At October 31, 1976 total Canadian loans amounted to \$2,144,589,940., an increase of 18% over the year before. As a result of a more aggressive policy and with the support of our new Customer Services Department, Corporate Banking Division, loans to the commercial, industrial and agricultural sectors have continued to rise. We focused our attention mostly on the small and medium-sized businesses whose credit needs can often reach up to \$1 million. Our development remains subject to the quality of the credit risks involved, but the imagination and the methods we have been using to solve our customers' credit problems were a key factor in the success experienced in obtaining new business.

The measures taken last year by the Federal Government to promote

residential construction largely contributed to the revival of this economic sector in which the Provincial Bank was particularly active. In fact, the Bank's mortgage loan portfolio increased by 26% to

\$417,745,522. at year-end. We have in general limited the amount of loans on single-family dwellings to the regional maximums set by the Central Mortgage and Housing Corporation. This has enabled some 3,300 of our customers to become home owners in 1976. About 60% of them were eligible to the Federal Assisted Home Ownership Program.

It is to be expected that housing starts will continue at the same pace during the next financial year. We intend to meet the requests submitted to us and we anticipate to increase our activity in

the mortgage field.

In the consumer credit sector, our objectives had been set by taking into account the highly competitive nature of this market and the forecast of a moderate demand. The demand was stronger than expected and our objectives were effectively exceeded. We experienced an increase in volume of around 15% which is about the same as last year's level. Inflation partly accounts for this rise since the increase in the number of accounts is slightly smaller than in 1975. In the automotive sector, demand remained stable throughout the year. However, the largest rise was experienced in the mobile home sector.

We continue to enter into master agreements with dealers and merchants since they represent an important source of growth for our consumer credit business. Let us mention moreover that the objectives in terms of business volume which had been set for Master Charge were attained.

At this point, I would like to inform you that, last September, the Bank invested \$1,100,000. in Crédit Industriel Desiardins. This amount represents 10% of the capital of this company which is a subsidiary of the Société d'Investissement Desiardins. The main activities of the C.I.D. are commercial and industrial term loans.

**International Operations** 

Foreign currency deposits amount to \$835,375,111. at October 31, 1976 and, even though they remained rather stable throughout the year, their contribution to our profitability has increased. The contribution of international operations to balance of revenue before income taxes now amounts to \$3,475,000., an increase of 5% over 1975. Since the accounting definition of the term international operations may vary considerably from one institution to another, I deem it necessary to specify that, in our case, it covers all transactions on the financial and exchange markets, including those made with Canadian residents, but excluding those effected for our branches

Jean Machabée

and their customers.

International loans and commitments reached the amount of \$223 million last October 31. While certainly being strongly positive, our policy on this matter may be described as prudent and cautious. We anticipate that the gradual improvement of the worldwide economic situation will enable us in 1977 to increase the volume of our interests in financing programs designed for industrialized and developing countries while maintaining strict evaluation standards.

However, the improvement of our means for offering good service to our Canadian customers will continue to be our main objective in the international sector. Our programs designed for assisting medium-sized businesses in their commercial relations with foreign countries have become increasingly useful and appreciated.

Revenue, Expenses and Capital

Interest income from loans and investments totals \$295,575,892. On the other hand, the total cost of interest paid on deposits and debentures amounts to \$199,706,298. The difference between these elements of income and expenses is \$95,869,594., a growth of 20% over the year before. This is the result of a small rise in the gross profit margin, but mostly of an increase in volume attributable mainly to additional funds of \$10,237,500. originating from our last rights issue which was fully used in 1976, from the proceeds of a debenture issue of \$10 million made on the Canadian euro-dollar market last February as well as from the increase of 18% in the average of total deposits in 1976.

Other revenue increased by 15% to \$20,528,961. This rise reflects, among other things, the growth in the business volume of Master Charge and in the volume of transactions made by cheques.

Operating costs other than interest rose by \$14,819,545. or 21%. Salaries, pension contributions and other staff benefits account for the larger part of this increase. I should also emphasize that in the other operating expenses is included an amount of \$3,845,000. representing the provision for losses on loans based on five-year average loss experience. The difference between the loan loss experience over that average appears in the statement of accumulated appropriation for losses and amounts to \$1,922,379. The loan loss experience for 1976 thus stands at \$5,767,379. compared to \$3,145,731.in 1975.

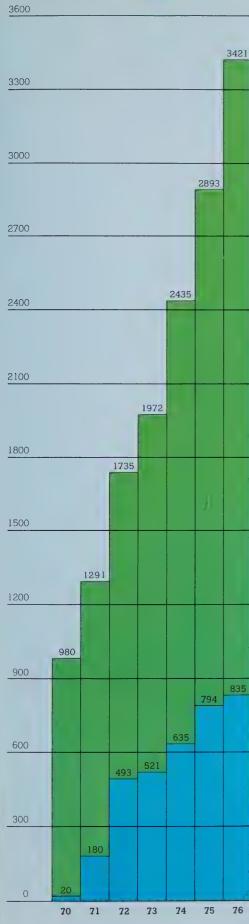

The balance of revenue after provision for taxes amounts to \$16,988,409., a rise of 20.6% over 1975. This represents \$2.50 per share compared with \$2.38 the preceding year, whereas the average of shares outstanding was slightly lower.

An amount of \$6,200,000. was transferred from the balance of revenue after provision for taxes to the appropriations for losses, leaving net profits of

paid to shareholders in dividends.

The Bank's capital funds at the end of the 1976 financial year amounted to \$116 million, an increase of \$18 million or

19% over last year. This important rise stems from the balance of premiums received on capital stock subscriptions, undivided profits during the financial year and a debenture issue of \$10 million. In the present business conditions, it is of the utmost importance to have a strong capital structure and this is one of our objectives.

**Data Processing** 

With regard to data processing, the emphasis is placed on planning which is so important for the development of a strategy which will enable us to remain competitive through both cost reduction and the quality of services offered to customers. In order to attain these objectives, we have therefore enlarged the structures of the Data Processing Department by dividing it in two sectors: systems and services. The first one deals with computer operations, programming, and planning. The second one comprises clearing, users liaison services and the credit card department.

Marketing

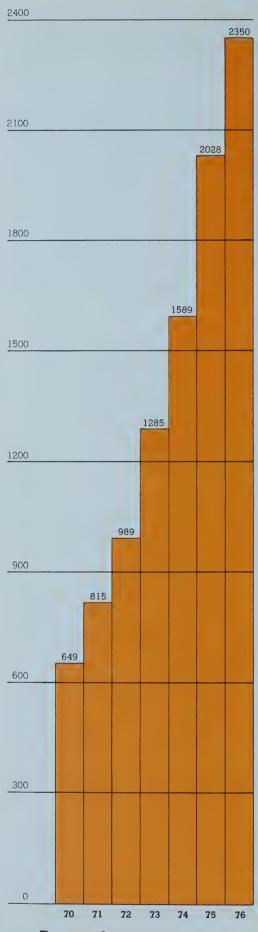

As far as marketing is concerned, we have several realizations to mention. First of all, eight branches were added to our network this year. Three were opened in the Montreal area, two of which in the new buildings of l'Alliance and Complexe Desjardins. The other ones were established in the cities of Charlesbourg, La Pocatière, Port Cartier and Val d'Or in Quebec as well as in Petit-Rocher, New Brunswick. Our new branch in Val d'Or represents a first step towards the development of a new market in Abitibi where we intend to strengthen our representation by opening two other branches this year, one in Rouyn and another in Amos

At October 31, the Bank therefore had 297 branches, 245 of which are located in Quebec, 28 in Ontario, 22 in New Brunswick and 2 in Prince Edward Island. With its 35 agencies, the Bank now has 332 access points in four

Our advertising theme has also been changed this year, as evidenced by the current campaign which depicts us as La Banque d'Ici.

Two new services were also offered to customers: Agripro and Advant'Age. The first one, Agripro, is a financing program intended for farmers which was established following the promulgation, this year, by the Quebec Government, of an Act to promote credit to farm producers. This program confirms our desire to participate more actively in the financing of agricultural production and increase our share of this market. The second one, Advant'Age, is a program of banking services designed for persons of sixty years of age or over. It is a sign of the Bank's preoccupation for a group of persons who, because of their income which remains stable, are more affected by the increase in the cost of living. Advant'Age enables them to obtain certain banking services without charge and also higher income on certain categories of deposits.

#### Loans (in millions of dollars)

Personnel

Our most important asset, our personnel, rose from 4,441 persons to 4,813 during the year. I am very pleased to point out that in addition to representing more than 71% of this asset, an increasing number of women are holding management positions both in branches and at Head Office. For example, among our accountants, 40% are women compared with 12% three years ago.

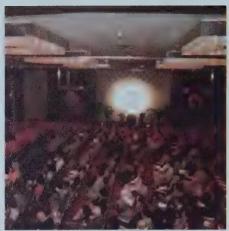

More than 15% of the Bank's staff is enrolled in university-level courses sponsored by the Institute of Canadian Bankers. The interest shown by employees for these programs and those given by the Bank reflects a desire to acquire new knowledge and meet the everincreasing requirements of their duties.

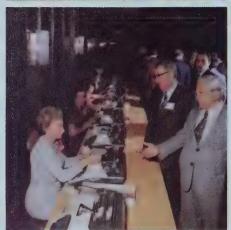

At the end of this financial year, I am very pleased to pay tribute to the staff members of the Bank for their cooperation and the spirit they have shown and I wish to thank them for their contribution to the results obtained.

Ladies and Gentlemen, I believe I have given you a true picture of the Bank's business situation at October 31, 1976. I thank you for the support you have given the Bank during the past financial year and I venture to hope that you will maintain it throughout the current

#### Minutes

Minutes of the Seventy-Sixth Annual General Meeting of the Shareholders of The Provincial Bank of Canada, held at the Queen Elizabeth Hotel, 900 Dorchester Blvd West, Montreal on the 14th day of December, 1976, at three thirty o'clock in the afternoon.

The Chairman of the Board of Directors, Mr. Léo Lavoie, acted as Chairman and the Secretary General of the Bank, Mr. René Cousineau, as Secretary of the Meeting. The Chairman appointed Messrs François Bélanger and Florian Bleau to act as Scrutineers.

The Chairman welcomed the share-holders and then commented upon the changes which had occurred in the Executive as well as in the Board of Directors since the latest Annual General Meeting. He also made observations on the shares of the capital stock of the Bank. Mr. Lavoie's address appears on page 5.

The Secretary then read the notice calling the meeting and an affidavit concerning publication of said notice.

At the request of the Chairman, the Scrutineers confirmed that a quorum was present.

The Minutes of the last Annual General Meeting having been sent to all shareholders, it was moved by Mr. Jean-Yves Gélinas, and seconded by Miss Germaine Toupin, that the Minutes of the last Annual General Meeting be taken as read and be approved. The motion was put to the Meeting and a ballot was taken. Upon receiving the Scrutineers' Report of the balloting, the Chairman declared the motion duly carried.

**Annual Statements** 

Before submitting the Annual Statements prescribed by Section 60 of the Bank Act for consideration to the Meeting, the Chairman indicated that the Statement of Assets and Liabilities of the Bank and Pro-Can Realties Limited as at October 31, 1976, the Statements of Rest Account, Revenue, Expenses and Undivided Profits and Accumulated Appropriation for Losses for the latest financial year had been forwarded to all shareholders in advance of the Meeting and that copies of the same were in the hands of those present. "We will forego, with your approval, he added, the actual reading of these statements since the Vice-President and General Manager will later comment on these.

It was then moved by Mr. Gerald M. Naimer, seconded by Mr. Bernard Bélanger, that the Annual Statements be taken as read.

The Chairman directed that a ballot on this motion be taken later in the Meeting at the same time as the ballot for the approval of the Annual Statements.

At the request of the Chairman, the Secretary read the Directors' Report: "Your Directors take pleasure in

submitting to the Shareholders the Bank's

Annual Statement for the year ended October 31, 1976, containing the Statement of Assets and Liabilities of the Bank and Pro-Can Realties Limited, the Statement of Revenue, Expenses and Undivided Profits, the Statement of Accumulated Appropriations for Losses and the Rest Account.

The Shareholders' Auditors, Messrs Guy Chabot, C.A., and Louis-Yvan Morin, C.A., audited the Bank's records and those of Pro-Can Realties Limited, a company controlled by the Bank, and their reports are appended to each statement.

During the year, eight new branches were opened and one was closed. As at October 31, 1976, the Bank had two hundred and ninety-seven branches and thirty-five agencies.

Your Directors express their appreciation to the officers and staff of the Bank for the continued loyalty and dedication they have shown in the discharge of their duties.

For the Board of Directors, Léo Lavoie, Chairman. Montreal, December 14, 1976.''

The Auditors' Report to Share-holders was then read.

The Chairman, Mr. Léo Lavoie, called upon the President, Mr. Michel Bélanger, to give his views on the revision of the Bank Act. Afterwards, the Vice-President and General Manager, Mr. Jean Machabée, submitted the financial statements. Mr. Bélanger's address appears on page 7 and Mr. Machabée's report appears on page 19.

It was moved by Mr. Léo Lavoie, seconded by Mr. Michel Bélanger, that the Directors' Report, the Annual Statements for the financial year ended October 31, 1976 as well as the Auditors' Report to Shareholders, be adopted. The Chairman stated that the motion was open for discussion. There being no discussion, the Chairman then put the motion to the Meeting. A ballot was taken and upon receiving the Scrutineers' report of the balloting, the Chairman declared this motion duly carried as well as the motion concerning the reading of the Annual Statements.

#### Appointment of Auditors Appointment of Proxies for Pro-Can

It was moved by Mr. Robert Labine, seconded by Mr. Benoit Parizeau, that Messrs Guy Chabot, C.A. of Raymond, Chabot, Martin, Paré et Associés, and Louis-Yvan Morin, C.A., of Morin, Dufresne, Cloutier, Bédard et Associés, be appointed the Auditors of the Bank until the next Annual General Meeting, that their remuneration be not more than \$50,000 and that their fees be divided between them in proportion to the time they will have devoted to the Bank's business. Before putting this motion to the Meeting, the Chairman suggested

that the appointment of proxies to vote in the name of the Bank at meetings of shareholders of Pro-Can Realties Limited be also submitted to the consideration of the Meeting and that a ballot on each motion be taken afterwards.

It was moved by Mr. Ryan Paquette, seconded by Mr. Armand-J. Bodin, that in accordance with the Bank Act, Mr. Léo Lavoie, or failing him, Mr. A.-Hervé Hébert, or failing him, Mr. C.F. Carsley, be appointed to act as proxy for the Bank at any and all meetings of the shareholders of Pro-Can Realties Limited, a corporation controlled by the Bank. These two motions were then put to the Meeting and a ballot was taken on each one

Upon receiving the Scrutineers' Report of the balloting on the appointment of Auditors and on the appointment of proxies to vote in the name of the Bank at meetings of shareholders of Pro-Can Realties Limited, the Chairman declared these two motions duly carried.

#### Abrogation of subsection (b) of Section 1 of the Shareholders' By-Laws

The Chairman, Mr. Léo Lavoie, having explained at the beginning of the meeting the reasons why shareholders were asked to approve the abrogation of this By-Law, called upon shareholders to bring up questions if they so desire. No further question being put up, it was moved by Mr. Gustave Papillon, seconded by Mr. Michel Delage, that subsection (b) of Section 1 of the Shareholders' By-Laws, concerning the Chairman, Secretary and Scrutineers at meetings of shareholders, be rescinded. A ballot was taken and upon receiving the Scrutineers' Report of the balloting, the Chairman declared the By-Law abrogated

#### **Election of Directors**

The Meeting then proceeded with the election of Directors. It was moved by Mr. Louis-E. Landry, seconded by Mr. Nap. Mackay, that the following shareholders be elected Directors of the Bank: Messrs. François Adam, F.I.A.C., Marcel Bélanger, C.A., Michel Bélanger, Hervé Belzile, C.A., Guy Bernier, Marc Bourgie, C.F. Carsley, M.B.E., Rodolphe Casgrain, Roland Chagnon, C.A., Charles-E. Demers, Eng., Claude Ducharme, Q.C., Gilbert Finn, Roland Giguère, J.-G. Hamelin, A.-Hervé Hébert, F.S.A., F.C.I.A., Léo Lavoie, Paul-H Plamondon, J.-Olier Renaud, Q.C., Maurice-W. Soucy and Antoine Turmel. The Chairman then asked if there were any further nominations.

There being no further nominations, a ballot was taken. The Chairman announced, upon receiving the Scrutineers' report of the balloting, that the twenty shareholders nominated to be Directors of the Bank had been elected by a majority of the votes.

At this point in the meeting the

Chairman invited questions but as there was no response, he declared the meeting terminated.

## Meeting of the Board of Directors.

At a meeting of the Board of Directors held subsequently to the Meeting of Shareholders, the following Officers were elected for the ensuing year: Chairman of the Board and Chief Executive Officer: Mr. Léo Lavoie President: Mr. Michel Bélanger Vice-Presidents: Messrs C.F. Carsley and A.-Hervé Hébert.
